Faculty of Computer Science and Mathematics

Lab Exercise 2

Name:	NIK NUR AIN ZUREEN BINTI NIK NAZMAN
Matric Num:	S81224

Overview:

This in-class exercise extends Lab Exercise 2. You will apply tables (including colspan and rowspan), forms (text inputs, radio buttons, checkboxes, drop-down lists and labels) and semantic HTML tags (header, nav, section, article and footer) to solve a realistic problem.

There are two problems. Your lecturer will assign one problem to you, or you may be asked to complete both.

Learning Outcomes

1. Create tables with headers and merged cells using colspan and rowspan.

2. Build forms with appropriate input types, correctly linked labels and grouped radio buttons.

3. Structure a web page using semantic HTML tags.

4. Identify and correct errors in tables, forms and semantic structure, and validate code using the W3C Validator.

Best of luck!

Problem A: Faculty Event Page with Schedule and Registration

Your faculty is organising a one-day event, for example a Programming Workshop, a Career Day or a Hackathon. The organising committee needs a simple web page that shows the event schedule and allows students to register. Build the page using HTML only (no CSS). You may choose any event name, date and activities.

Instructions

Create a file named lab2_ExerA.html that contains the following:

1. Semantic Structure

- A `<header>` containing an `<h1>` with the event name and a short tagline.
- A `<nav>` with internal links (e.g. `href="#schedule"`, `href="#register"`, `href="#about"`) that jump to each section of the page.
- At least three `<section>` elements, each with an `id`: About the Event, Event Schedule and Registration.
- Inside the About section, two `<article>` elements, each introducing one speaker or one activity (with an `<h3>` and a `<p>`).
- A `<footer>` with the organiser name and a copyright line using `©`.

2. Event Schedule Table

- A table with `border="1"` and header cells (`<th>`) for Time, Activity, Venue and Person in Charge.
- At least 6 rows of activities from morning to evening.
- Use `colspan` at least once (e.g. a "Lunch Break" row that spans across Activity, Venue and Person in Charge).
- Use `rowspan` at least once (e.g. two consecutive sessions held in the same venue).

3. Registration Form

Create a form with `action="register.html"` and `method="post"` that contains:

- Text inputs for Full Name, Matric Number and E-mail, each with a `<label>` whose `for` matches the input `id`.
- Radio buttons for Year of Study (Year 1 – Year 4). All radio buttons must share the same `name` so only one can be selected.
- Checkboxes for the sessions the student wants to join (at least 3 choices).
- A drop-down list (`<select>`) for Programme or Faculty with at least 4 options.
- A submit button.

4. Comments

- Use comments (`<!-- ... -->`) to explain each section of your code.

Submission

Save the file as lab2_ExerA.html, validate it at `https://validator.w3.org` (Validate by File Upload), and submit it (Submit lab2_ExerA.html and Screenshot of validation) through Github

PROBLEM A – Answer

Code:

```
<!DOCTYPE html>
<html lang = "en">
    <head>
        <meta charset="UTF-8">
        <meta name="viewport" content="width=device-width , initial-scale=1,0 ">
        <title>FACULTY EVENT PAGE</title>
    </head>

    <body>
        <!-- Header with a event name and short tagline-->
        <header>
            <h1> Cybersecurity Workshop </h1>
            <p> Protect Your Digital World!</p>
        </header>

        <!-- Navigation -->
        <nav>
            <a href="#about"> About The Event </a> |
            <a href="#schedule"> Event Schedule </a> |
            <a href="#registration"> Event Registration </a>
        </nav>

        <section id="about">
        <!--About the event -->
            <h2> About The Event</h2>
                <p> This Cybersecurity Workshop teaches students how to protect thei personal
                information and to stay safe on the internet.</p>

                <!-- article 1 -->
                <article>
                    <h3>Speaker 1: introduction to Cybersecurity</h3>
                        <p>Dr. ts. Nik Zureen will explain about cybersecurity threats such
                        as viruses, makware and unsafe websites or links.</p>

Output:

Cybersecurity Workshop

--Protect Your Digital World!

About The Event | Event Schedule | Event Registration

About The Event

This Cybersecurity Workshop teaches students how to protect thei personal information and to stay safe on the internet.

Speaker 1: introduction to Cybersecurity

Dr. ts. Nik Zureen will explain about cybersecurity threats such as viruses, makware and unsafe websites or links.

Activity 2: Password Safety

Dr. Amirul Amran will teach students how to create stromg passwords and recognise phishing emails.

Event Schedule

Time	Activity	Venue	Person in Charge
8:00 AM - 8:30 AM	Registration	Main Hall	Organising Committee
8:30 AM - 9:00 AM	Opening Ceremony	Main Hall	Faculty Representative
9:00 AM - 10:00 AM	Introduction to Cybersecurity		Dr. ts. Nik Zureen
10:00 AM - 10:30 AM	Morning Tea Break		
10:30 AM - 12:00 PM	Password Safety Demonstration	Computer Lab 1	Dr. Amirul Amran
12:00 PM - 1:00 PM	Lunch Break		
1:00 PM - 2:00 PM	Phishing Awareness Activity	Computer Lab 1	Workshop Team
2:00 PM - 3:00 PM	Cybersecurity Quiz	Seminar Room	Student Committee
3:00 PM - 4:00 PM	Closing Ceremony	Main Hall	Organising Committee

Registration Form

Problem B: Course Feedback Page (Debugging and Extend)

A student helper created a Course Feedback page for CSF3133. The page shows a feedback summary table and a feedback form, but it contains several errors. Some radio buttons can be selected at the same time, clicking some labels does nothing, and the table looks broken. Your tasks are to find and fix the errors, then extend the page.

Given Code

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="utf-8">
    <title>Course Feedback</title>
</head>
<body>
<header>
    <h1>CSF3133 Course Feedback</h1>
</head>
<nav>
    <a href="#results">Results</a> | <a href="#form">Feedback Form</a>
</nav>
<section id="results">
    <h2>Feedback Summary</h2>
    <table border="1">
        <tr>
            <th>Week</th>
            <th>Topic</th>
            <td>Rating</td>
        </tr>
        <tr>
            <td>1</td>
            <td>Introduction to HTML</td>
            <td>4.5</td>
        <tr>
            <td>2</td>
            <td colspan="3">Tables and Forms</td>
        </tr>
        <tr>
            <td>3</td>
            <td>Semantic HTML<td>4.0</td>
        </tr>
    </table>
</section>
<section id="form">
    <h2>Give Your Feedback</h2>
    <form action="submit_feedback.php" method="post">
        <label for="name">Name:</label>
        <input type="text" id="fullname" name="name"><br>
        <label>Overall rating:</label><br>
        <input type="radio" id="good" name="good" value="good">
        <label for="good">Good</label>
        <input type="radio" id="poor" name="poor" value="poor">
        <label for="poor">Poor</label><br>
        <input type="checkbox" id="lab" name="lab" value="yes">
        <label for="labs">I attended all labs</label><br>
        <input type="submit" value="Submit">
    </from>
</section>
<footer>
    <p>Copyright &copy 2026 CSF3133</p>
</footer>
</body>
</html>
```

Instructions

Part 1. Find and Fix the Errors

1. Copy the given code into a new file named lab2_ExerB.html.

2. Identify and correct all errors. At the top of the `<body>`, write an HTML comment listing each error and the line number, e.g. `<!-- Error 1 (Line 1): missing <!DOCTYPE html> -->`.

4. Validate your corrected file at `https://validator.w3.org`. Your final page must show "No errors or warnings to show".

Part 2. Extend into a Two-Page Website

5. Table: add rows for Week 4 and Week 5. Both weeks cover the same topic "Mini Project", so use `rowspan="2"` on the Topic cell. Add a final row "Average Rating" that uses `colspan="2".`

6. Form: add an E-mail text input with a matching `<label>`, a third radio option "Average", a group of at least 3 checkboxes "Topics I want more practice on", and a `<select>` for Section/Group (at least 3 options).

7. Semantic HTML: add a new `<section id="comments">` titled "Student Comments" that contains two <article> elements, each with an `<h3>` (student name) and a `<p>` (comment). Add a link to this section in the `<nav>`.

8. Use comments to explain each new section of your code.

Submission

Save the file as lab2_ExerB.html, validate it at `https://validator.w3.org` (Validate by File Upload), and submit it (Submit lab2_ExerB.html and Screenshot of validation) through Github

PROBLEM B – Answer

Code:

```
<!DOCTYPE html>
<html lang="en">
    <head>
        <meta charset="utf-8">
        <title>Course Feedback</title>
    </head>
    <body>

    <!-- Errors in the original code:
    Error 1 (Line 10): </head> should be </header>.
    Error 2 (Line 20): Rating must use <th>, not <td>.
    Error 3 (Line 26): Missing </tr> for Week 1.
    Error 4 (Line 28): Incorrect colspan="3" in the Week 2 row.
    Error 5 (Line 32): Missing closing </td> for Semantic HTML.
    Error 6 (Line 40): Label for="name" does not match id="fullname".
    Error 7 (Lines 42-45): Radio buttons have different names.
    Error 8 (Line 47): Label for="labs" does not match id="lab".
    Error 9 (Line 49): </from> should be </form>.
    Error 10 (Line 48): The original form is not properly closed.
    Error 11 (Line 52): Copyright entity should be &copy;.-->

Rubric

Table A: Rubric for Additional Lab Exercise 2 – Problem A

Criteria	Description	Marks
Table Creation	Schedule table has <th> headers, at least 6 rows of meaningful data, and correct use of colspan and rowspan (no extra or missing cells).	3
Form Structure	Form contains text inputs with matching <label for> and id, a grouped set of radio buttons (same name), at least 3 checkboxes, a <select> with at least 4 options, and a submit button.	3
Semantic HTML	Proper use of <header>, <nav> with working internal links, <section> (min. 3), <article> (min. 2) and <footer>.	2
Code Organization and Readability	Code is well-organized, properly indented and commented. File is named lab2a.html and passes the W3C Validator.	2
Total		**10**

Table B: Rubric for Additional Lab Exercise 2 – Problem B

Criteria	Description	Marks
Error Identification	At least 7 errors correctly identified with line numbers and listed in an HTML comment.	3
Error Correction & Validation	All errors corrected. Radio buttons work as one group, all labels are linked, and the page passes the W3C Validator.	2
Table Extension	Week 4 and Week 5 rows added with correct rowspan; Average Rating row uses correct colspan. No extra or missing cells.	2
Form Extension	E-mail input with label, third radio option in the same group, at least 3 checkboxes and a <select> with at least 3 options.	2
Semantic HTML and Code Organization	New <section> with two <article> elements and a working <nav> link. Code is indented and commented.	1
Total		**10**
